SIEM 2.0 for Managed Service Providers

LogRhythm delivers an enterprise-class platform to managed service providers (MSP/MSSP) that seamlessly integrates Log Management & SIEM 2.0, File Integrity Monitoring, and Host Activity Monitoring. Using LogRhythm to drive your managed SIEM practice will enable you to:

- Expand and accelerate threat detection & response capabilities
- Deliver comprehensive compliance automation & assurance
- Reduce client implementation costs and management overhead
- Increase ROI while lowering TCO

LogRhythm is cost-effective, easily deployed, and scales to fit the complete needs of your customer base. It is operated and managed through an easy-to-use, wizard-driven console and allows you to invest in a single solution to deliver log management and SIEM capabilities to your entire customer base.

Why LogRhythm?

- ✓ **Multi-tenant Data Management**
- ✓ **Flexible Deployment Options**
- ✓ **Simplified Central Management**
- ✓ **MSP/MSSP-specific Pricing Options**
- ✓ **Out-of-the-box Compliance Packages**

Managed SIEM Capabilities

Designed to address an ever-changing landscape of threats and challenges, LogRhythm arms you with a powerful arsenal of high-performance tools for security, compliance, and operations. LogRhythm delivers comprehensive, useful and actionable insight into what is really going on in and around an enterprise IT environment.

Powering your managed security and compliance operations with LogRhythm's SIEM 2.0 platform lets you reliably and efficiently deliver:

- Fully Integrated Log Management and SIEM
- Advanced Correlation and Pattern Recognition
- Real-time Alerting
- Extended Visibility and Context
    - Independent Host Activity Monitoring
    - File Integrity Monitoring
    - Enterprise-wide Network Visibility
- Powerful, Rapid Forensics
- Intelligent, Process-Driven Smart**Response**™ Capabilities
    - Immediate automated response to any alarm
    - Optional authorization process to comply with change management processes

Advanced Data Management for Multi-tenant Environments

Keeping your customers' data segregated without adding operational complexity and overhead or reducing capabilities is a challenge for any service provider. LogRhythm has industry-leading multi-tenancy capabilities, allowing you to protect customer data in multiple ways for maximum deployment flexibility. A unique logical entity structure allows you to provide cloud-based managed SIEM with full access to all customer data, while making it easy to ensure that individual customers can see only their own data. For those customers who require their raw log data and archives to remain completely separate from other organizations' data, any combination of virtual and/or appliance-based log managers can be allocated. Each Log Manager maintains its own online database of raw log data and controls how and where archives are stored. Each "tenant" retains its own online data store and archives, while discretionary access controls guarantee that confidential event data is viewed only by authorized users.

Enterprise Architecture for MSP/MSSP's

LogRhythm reduces operational overhead for highly distributed environments, such as an MSP/MSSP customer base. It is easily maintained through centralized monitoring and management of all components and a highly scalable modular architecture makes additional growth quick and painless. LogRhythm provides you with:

- Hardware, Software and Virtual Appliance Options
  ◦ Rapid and Extensive Scalability
  ◦ High Availability Configurations
- Secure, Compressed Remote Collection
- Easy Installation, Operation and Administration
- Centralized Monitoring and Management of All Components
- Multi-tenancy for Customer Data Segregation
  ◦ Segregation of Customer Data
  ◦ Granular, Role-Based Access

LogRhythm Labs

LogRhythm Labs' Knowledge Engineers help automate the process of turning raw data into actionable intelligence with relevant context, allowing MSP/MSSPs to provide enterprise correlation and meaningful visibility into the entire network. You will benefit from continuous research and development to provide your customers with:

- Comprehensive Device Support
- Expert Event and Threat Level Identification
- Intelligent Alarms, Investigations and Reports
- Smart**Response**™ Scripts for Common Use Cases
- Out-of-the-Box, Up-to-Date Compliance Packages (PCI, SOX, HIPAA, FISMA, GPG 13, GLBA, NERC CIP, etc.)

Flexible Pricing & Licensing Options

LogRhythm offers flexible pricing & licensing options for MSP/MSSPs, allowing you to develop pricing that directly aligns to the requirements of your customer base. All licensing options include advanced LogRhythm features, including File Integrity Monitoring, Host Activity Monitoring, Geolocation and the Advanced Intelligence (AI) Engine. Internal MSP/MSSP-oriented statistics directly align customer usage to billable output.

By Log Source
- Priced per individual log source (application event log, network device syslog stream, etc.)
- Map directly to LogRhythm pricing to differentiate offerings based on log source types

By Device
- Tiered pricing for high, medium, and low log volume devices
- Map LogRhythm licensing to fit a pricing model sold to end customers per managed device

By Log Volume
- Tiered pricing for licensing directly mapped to log volume consumption
- Map LogRhythm licensing to a volume-based pricing model for end customers

* Volume discount tiers are offered based on a monthly commitment level.
